SentryScan Security Assessment Report

Target: **localhost_lab_id4** (127.0.0.1) · Generated: 2026-11-02 09:40 · Scan Job #14

Overall Risk Level: **High**

7.0 / 10

No vulnerabilities identified by CVE/NSE matching. +2.0 because 1 weak credential login(s) succeeded on: ssh. Score floored at 7.0 (High) -- a successful credential compromise is never low-risk. Final overall score: 7.0/10 (High).

Findings (0)

No vulnerabilities were matched for this scan.

Weak Credential Findings (1)

Host	Service	Port	Username	Password
127.0.0.1	ssh	2222	sentryscan_lab	asdfqwerty12

Recommendations

- Enforce a strong password policy and multi-factor authentication where possible; rotate any credentials found to be weak immediately.
- Review and remediate all identified findings, prioritizing Critical and High severity items first; re-scan after remediation to confirm closure.

Authorized use only. This report was generated by SentryScan against a target that must be explicitly authorized for testing (lab environment or written permission). Do not use this tool or report against systems you do not own or have explicit authorization to test.
